

Bruce K Maillet

Director of Air Programs

Shaw EMCON/OWT

Mr. Maillet has over 30 years of experience in the areas of air quality, regulatory affairs and permitting, government relations, training and policy and planning. He has directed major air pollution control studies, advised senior political officials on air quality regulatory matters, and worked with major industrial, utility and solid waste clients to develop air quality strategies based on the requirements of the Clean Air Act.

Mr. Maillet has assisted numerous solid waste clients with complex air issues, including climate change activities, Greenhouse Gas Credits, air construction permits, New Source Review, Title V operating permits, and difficult odor control issues. Mr. Maillet, with extensive regulatory agency background, participates in solid waste industry / EPA regulatory discussions and development.

Maillet also trained and spoke at seminars on landfills and Greenhouse gas credits in the United Kingdom. These seminars were intended to instruct various clients and potential clients in the nuances of landfills and the UK GHG emission reduction scheme. . Maillet has participated in numerous planning and proposal efforts in the solid waste landfill arena for projects in Eastern Europe, South America and Central America.
